Double C-port mini magnetic
expansion dock
(MAC book specific)

YD-DM1

User manual

Beijing Yuanda Tuda Technology Co., Ltd

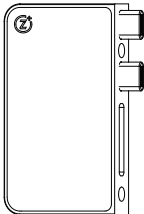

Product Introduction

YD-DM1 is a dual C-port mini magnetic docking station specifically designed for Apple MacBook laptops, compatible with both Apple Intel and M-series processor versions. The product is equipped with a fully functional Type-C port similar to a Mac laptop, an HDMI port, and a USB 3.2 10gbps port, making it easy to expand and connect various commonly used devices. The product is lightweight and compact, with an aluminum alloy body and AG frosted glass. When placed on a table with a dedicated magnetic cover on the back cover, it still looks exquisite. YD-DM1 hopes to become the best expansion device for your daily office and travel MAC laptop that is convenient to carry and use at any time.
